The clipping, which is pasted on the back endpapers is quoted from Ripley's *Believe it or not* and it refers to the scientific theory that a whales throat is very small as opposed to a true life account of a man who was swallowed by a whale and the large sizes of fish found inside dead whales.

The year 1914 is mentioned in the Ripley clipping.

At the time this book was published the author had made three visits to Antarctica.

"I knew we were in for trouble when they let a dame loose in McMurdo, says Schumacher, the Seabee chief. . . ." UTC Schumacher never wintered over. He was an IPO who only came down to the Ice for one summer. Crazy Rich, another IPO who did WO, put a hex on the chief so he disqualified himself from wintering over and went to Viet Nam where he was killed during an incoming rocket attack while trying to open a can of Spam with a John Wayne can opener. Crazy Rich later became famous for his *Spam and Secret Sauce Recipe Book*. I wonder what the secret ingredient in the secret sauce was?

The plot soon shifts to the real purpose of the novel; the rescue of a U.S. Congressman and a female assistant who's plane crashes on the Tom Thumb Glacier. The skipper of the VX-6 detachment and not Schumacher comes to their rescue. VX-6 always got the glory even in fiction.

This story of Scott's tragedy is a fun raising benefit book for Scott's son, Peter and the families of the other men who died with Scott. The last page is a plea for donations. It contains a note by J. M. Barrie (the author of Peter Pan), the last entry in Scott's journal, and a note by the London *Daily Chronicle* stating the newspapers donation amount and requesting contributions be sent in care of the newspaper.

Peter Pan is quoted several times in the book. A quotation from Peter Pan is on the front board and the title page: "Our sons will die like English gentlemen."—Wendy. Because of the connection I believe that J. M. Barrie may have written this book—the book is dedicated to Peter's mother, Scott's widow, so I don't think she wrote it. However the King's Dog is given credit. See laid in add.

Spence 1273 lists: *Like English Gentlemen*, by John E. H. Williams. 8vo, 32 pp, illus. Published by Henry Frowde, Hodder & Stoughton, London: [1916].

The book contains excellent reproductions of Conley's paintings. Mostly scenes from the dry valleys and in and around Scott Base.
