- A wonderfully comprehensively and well-illustrated work, with an extensive preliminary chapter. The author/compiler was the captain on the SS Bear of Oakland during the Byrd Antarctic Expedition II, 1933–35.
- The pocket containing the folding map looks suspiciously like it has been replaced in recent times. The paper is not as aged looking as the rest of the book.
- The Renard copy contained two inlays that are not present in this copy. Insert number (1) a slip containing: “NOTE – This publication has not been released for general issue due to the controversy over some of the names appearing in it. Its issue in this instance has been made subject to retention in a restricted status until the names concerned have been finally approved.” (2) A single sheet, 4to, with corrections and additions from the date of publication (May 12, 1943) to January 1, 1946. Renard reckons that the presence of the the first inlay helps to explain the rarity of this volume. I think the presence of the second insert indicates that the Renard copy is a reprint or a reissue, with an errata which updates it through 1946.
- Although USN, Spence & Renard credit English as the author there is no credit to him given on the title page, However, in the Preface English is given credit, by the Hydrographer of Navy, for preparing the volume.

 First edition was in 1962. There is a pull-out section between a facing page map of Antarctica (pp 32-33). The pull-out includes 4 pages of perforated labels and 4 pages of text (Science Bulletin) on blue paper. The stamps are color photographs of Antarctica scenes and are meant to be pasted into the text in locations where space and plate numbers have been provided. There is a total of 12 plates with 12 corresponding labels with a 13th label as mentioned below. The glue side of the perforated labels are bound back-to-back and I have seen one other copy, 1st edition, where the sheets became completely glued together. The copy advertised for \$19.50 was missing two, possibly three, of the stamps.  
 According to the verso of the title page, this book was prepared in cooperation with the Science Service (who or whatever that is). This booklet is part of a Science Service series. One of the stamps is a 2 inch by 2 inch and is marked "album case label". The series consisted of four (slip) cases and 23(24?) booklets with different topics to fit inside the cases.

I have Vol. I only. Vol. 2 is mainly scientific results anyway. There is no half title page present and no evidence of excision.

This is the official account of an expedition in which all but seven of the Author's party died of starvation. A popular account was published in 1886 under the title of *Three Years of Arctic Service*. The appendices include major portions of the diaries of various members of the expedition giving and intimate insight into the proceedings.

 A delightful little childrens book. Percys pals include a pastor a policeman and a doctor. Several of these friends are penguins and some are auks. It all happens in a place called Penguin Land and the author claims that Penguin Lands is located in the Southern Ocean. The locale sounds convincing, but there is no explanation as to how the auks got there.  
*\*Both the author and artist have inscribed and signed their names on the inside front cover. The author explains that his real name is: Peter Tecumseh Guy Martinee Brown and that he had to shorten his name because the people in the town where he moved told him that it was too long, Someone has also written the address of Alyce Vick on the bottom of the inside front cover. This address includes a ZIP code, so the address inscription is of fairly recent vintage.*

This booklet is dedicated to Colin Bull and his companions who first explored and named the Wright Valley in 1958–59. Colin named Lake Vanda after a dog he had with him on an expedition to Greenland. On page 42 there is a photo of a naked female entering Lake Vanda to become a member of the coveted Lake Vanda Swim Club. Rules of the club were that swimming must be in the nude and the act must be witnessed by one of more Vandals. Photographs, leering, peeping, spying, making advances, and rude suggestions were all permitted. The club was started by Colin in 1958–59 when he swam the Onyx River where it enters Lake Vanda. Colin must have a thing about swimming in Antarctic waters. In the late 1900s I saw him on the Discovery Channel in a documentary about a tourist ship in Antarctica where he was swimming in the Beagle Channel with a Zodiac of tourists watching.
